

February 20, 1953

Dear Dr. Pullinger:

If you can spare a copy, I would appreciate a reprint of your "Significance of functional differentiation in mammary tumors", from Lancet, 1949.

I am enclosing a brief note on a similar subject, for your information only, and not with any pretense of claiming originality on so recurrent a theme. I hope our techniques will soon reach the point where such hypotheses can be tested more directly.

Sincerely,

Joshua Lederberg
Associate Professor of Genetics
